

1

Must be installed by a qualified electrician in accordance with all national and local electrical and construction codes and regulations. Ensure system is de-energized before installation. Review electrical plans and read all installation instructions prior to installation. Failure to comply with the following installation instructions will void the warranty and may result in serious injury or possible death. With the constant development of our products please check our website (www.modalight.com) for the latest installation guide.

La instalación debe ser realizada por un electricista cualificado, de acuerdo con todos los códigos y normativas eléctricas y de construcción nacionales y locales. Asegúrese de que el sistema esté desconectado de la corriente antes de la instalación. Revise los planos eléctricos y lea todas las instrucciones de instalación antes de la instalación. El incumplimiento de las siguientes instrucciones de instalación anulará la garantía y podría provocar lesiones graves o incluso la muerte. Debido al constante desarrollo de nuestros productos, consulte nuestro sitio web (www.modalight.com) para obtener la guía de instalación más actualizada.

L'installation doit être effectuée par un électricien qualifié, conformément à tous les codes et réglementations électriques et de construction nationaux et locaux. Assurez-vous que le système est hors tension avant l'installation. Consultez les plans électriques et lisez toutes les instructions d'installation avant l'installation. Le non-respect des instructions d'installation suivantes annulera la garantie et peut entraîner des blessures graves, voire mortelles. Nos produits étant en constante évolution, veuillez consulter notre site web (www.modalight.com) pour obtenir le guide d'installation le plus récent.

3

Fixture Mounting

Artículos fijos Montaje

Fixation Montage

Ensure the mounting surface is level before installing each Moda Interior fixture. Suitable substrates include steel, aluminum, concrete, or wood.

Each Moda Interior fixture is supplied with two integrated swivel mounts for attachment to suitable surfaces. The fixture can be adjusted from vertical to horizontal, with a tilt range of approximately 90° from vertical.

Use hardware, bolts, or screws (supplied by others) that are properly sized for the mounting bracket bases and appropriate for the installation surface.

4

Mount to surface using the 2 screw holes on the bracket

Monte a superficie utilizando los 2 agujeros para tornillos en el soporte

Mont à la surface en utilisant les 2 trous de vis sur le support

Accepts screw sizes

Structural Screws #8 #10 #12

Self tapping #8 #10 #12

Concrete Anchor 3/16"

(By others)

5

Fixture Tilt Adjustment

Ajuste de la inclinación del accesorio

Réglage de l'inclinaison du luminaire

To adjust the tilt, loosen the bracket tilt bolts located at each end of the fixture using a 4mm Allen wrench. Tilt gauges on both sides of each mount provide accurate angle reference. Once the desired tilt angle is set, tighten the bolts securely to lock the position.

Tilt Gauge: Each mark indicates a 5° increment.

Ordering SKU: MPGMA-I-XXFT-SV

Bras de fixation au sol

The fixture can be adjusted up to 240° for precise positioning.

Use hardware, bolts, or screws (supplied by others) that are properly sized for the mounting bracket bases and appropriate for the installation surface.

(By others)

Ajuste de la inclinación del brazo de montaje en el suelo
Réglage de l'inclinaison du bras de fixation au sol

To adjust the tilt, loosen the bracket tilt bolts located on the side of the bracket using an M5 (5mm) Allen wrench. Tilt gauges on the side of each mount provide accurate angle reference. Once the desired tilt angle is set, tighten the bolt securely to lock the position.

Tilt Gauge: Each mark indicates a 5° increment.

Fijación del accesorio al brazo de montaje en el suelo
Fixation du dispositif au bras de montage au sol

The Moda Interior Ground Arm includes two set screws. One side of the mounting bracket can be detached from the arm by loosening the set screw. Once disconnected, the bracket can be attached to the underside of the fixture. After installation, slide the mounting bracket back into the arm. Position the arm in the desired location on the fixture, then tighten the set screws to secure the arm in place.

Ajuste de la inclinación del brazo de montaje en el suelo
Réglage de l'inclinaison du bras de fixation au sol

Abrazadera para cables
Serre-câble

The Moda Interior Ground Mounting Arm includes cable clamps that attach to the extruded channel on either side of the arm. The number of cable clamps provided will vary depending on the length of the arm.

	Mounting Arm Length

Cable Clamp Quantity	1	2	3	4

11 Pendant Mounting Arm

Ordering SKU: MPGMA-I-XXFT-SV
Brazo de montaje colgante
Bras de fixation pour luminaire suspendu

The installer must ensure the surface is sound, level, and free of cracks or damage. Suitable substrates include steel, aluminum, concrete, or wood. Use properly sized hardware (by others) for the mounting bracket and surface.

The fixture can be adjusted up to 240° for precise positioning.

Remove the existing brackets located on either end of the fixture as these are no longer required.

Use hardware, bolts, or screws (supplied by others) that are properly sized for the mounting bracket bases and appropriate for the installation surface.

Serre-câble

The Moda Interior Pendant Mounting Arm includes cable clamps that attach to the extruded channel on either side of the arm. The number of cable clamps provided will vary depending on the length of the arm.

Cable Clamp Quantity	Mounting Arm Length			
	6in	12in	18in	24in
	1	2	3	4

A technical drawing showing two parallel linear guides. Each guide consists of a long, rectangular rail with a T-shaped cross-section. The rails are mounted on a vertical support plate using two screws. The front ends of the rails are shown with a detailed view of the internal ball bearing assembly, which includes a series of balls in a raceway. The drawing is a perspective view, showing the rails from a slightly elevated angle.

A technical line drawing showing the assembly of a Tilt Gauge and a Tilt Bolt. The Tilt Gauge is a long, thin rectangular plate with a circular dial at one end. The Tilt Bolt is a long, thin rod with a hexagonal head at one end and a threaded section at the other. The diagram shows the Tilt Bolt being inserted into the Tilt Gauge. Labels with leader lines point to the 'Tilt Gauge' and the 'Tilt Bolt'.

Detachable Fixture Mount

Set Screw

This diagram illustrates the detachable fixture mount assembly. It shows a metal bracket with a threaded rod and a set screw. The bracket is designed to be attached to a surface, and the set screw is used to secure the assembly. The diagram is a technical line drawing showing the internal components and the mounting mechanism.

A line drawing showing the cable tray assembly with a cable being inserted into the end. A label 'Cable Clamp' points to a small component being attached to the end of the tray to secure the cable.

21

Leader Cable Wiring

Cableado de cables líderes

Câblage de câble leader

Moda Interior fixtures utilize proprietary 6-way connectors for both power and 0–10V control. Connector placement at each end of the fixture allows direct end-to-end connection without the need for additional link cables.

Leader cables, available separately in 10ft, 25ft and 50ft lengths, provide both power and control connections. The wiring configuration is as follows:

	UL/cUL	Pinout
Live 100-277V	Black	4
Neutral	White	6
Ground	Green	2
0-10V (+)	Purple	3
0-10V (–)	Pink	5
Not Used	Grey	1

22

Fixture to Fixture Connection

Conexión de accesorio a accesorio

Connexion d'appareil à appareil

Each Moda Interior fixture is equipped with a male input plug on one end and a female output socket on the other. For end-to-end installations, the input plug of one fixture connects directly to the output socket of the preceding fixture.

If spacing is required between fixtures, optional jumper cables are available to bridge the gap.

Step 1: Align the male and female connector.

Paso 1: Alinear el conector macho con hembra.

Étape 1: Alignez le connecteur mâle et femelle.

Step 2: Push connection together (listen for the “click” that confirms a full connection)

Paso 1: Empuje la conexión para unirla (escuche el “clic” que confirma una conexión completa)

Étape 1: Appuyez sur la connexion ensemble (écoutez le « clic » qui confirme une connexion complète)

23

Fixture to Fixture Disconnect

Desconexión de accesorio a accesorio

Déconnexion d'un appareil à l'autre

Twist the connector slightly and carefully separate the cables.

Gire ligeramente el conector y separe con cuidado los cables.

Tournez légèrement le connecteur et séparez soigneusement les câbles.

WARNING!

Ensure system is fully de-energized before connecting or disconnecting. “Hot plug” connections can result in a power surge which can destroy the entire run of fixtures.

24

Curved Layouts

Diseños curvos

Dispositions courbes

Each fixture has a short power/signal input cable that can extend to simplify connection or disconnection, while also allowing limited angular adjustment of up to 90° between adjacent units.

Avoid placing strain on the cable when making connections. For larger gaps or wider angles, use the optional jumper cables.

25

Final Fixture Termination

Terminación del último partido

Fin du match final

At the final fixture in the run, always install the terminator cap on the output connector to ensure the live contacts are safely protected.

Step 1: Align the male and female connector.

Paso 1: Alinear el conector macho con hembra.

Étape 1: Alignez le connecteur mâle et femelle.

Step 2: Push connection together (listen for the "click" that confirms a full connection)

Paso 2: Empuje la conexión para unirla (escuche el "clic" que confirma una conexión completa)

Étape 2: Appuyez sur la connexion ensemble (écoutez le « clic » qui confirme une connexion complète)

26

Connection types

Tipos de conexiones

Types de connexion

Fixture sizes of 1ft and 4ft can be mixed. Do NOT mix different wattage fixtures or exceed max run lengths (see section 2)

Se pueden combinar luminarias de 30 cm y 120 cm. NO combine luminarias de diferente potencia ni exceda las longitudes máximas de instalación (consulte la sección 2).

Les luminaires de 30 cm et 1,2 m peuvent être combinés. Ne mélangez pas des luminaires de puissances différentes et ne dépassez pas les longueurs maximales autorisées (voir section 2).

27

Attach Optional Louver

Adjuntar rejilla opcional

Fixer une persienne en option

Step 1: Attach optional louver to the top of the fixture until it clicks into place. Use four of these louvers for four foot fixtures.

Paso 1: Coloque la rejilla opcional en la parte superior de la luminaria hasta que encaje. Use cuatro rejillas para luminarias de cuatro pies.

Étape 1: Fixez la grille optionnelle sur le dessus du luminaire jusqu'à ce qu'elle s'enclenche. Utilisez quatre de ces grilles pour les luminaires de 1,20 m.

28

Detach Optional Louver

Desmontar la rejilla opcional

Détacher la persienne en option

Step 1: Working along one side of the louver, use a small flat-blade screwdriver to carefully release the louver from the fixture. Apply slight outward pressure on the louver side as you progress to prevent it from snapping back into place.

Paso 1: Trabajando a lo largo de un lado de la persiana, use un destornillador pequeño de punta plana para soltarla con cuidado del soporte. Aplique una ligera presión hacia afuera en el lado de la persiana a medida que avanza para evitar que vuelva a su lugar.

Étape 1: En travaillant le long d'un côté de la grille, utilisez un petit tournevis plat pour la détacher délicatement du luminaire. Exercez une légère pression vers l'extérieur sur le côté de la grille au fur et à mesure de la progression pour éviter qu'elle ne se remette en place.

29

Attach Optional Louver with 4ft Fixtures

Conecte la rejilla opcional con accesorios 4ft

Fixez le volet en option avec les luminaires 4ft

Louvers are supplied in 1ft (304 mm) sections. A total of four sections are needed to fully cover a 4ft fixture.

Las rejillas se suministran en secciones de 304 mm (1 pie). Se necesitan cuatro secciones para cubrir completamente una luminaria de 1,22 m (4 pies).

Les persiennes sont fournies en sections de 304 mm (1 pi). Quatre sections sont nécessaires pour couvrir entièrement un luminaire de 1,2 m (4 pi).

Quick Installation Tips

Consejos rápidos para la instalación
Conseils d'installation rapides

1. **Setback:** ~1/5 of wall height ensures even vertical coverage.
2. **Orientation:** Tilt optics upward for uniform top-to-bottom wash.
3. **Continuous runs:** Recommended to avoid gaps and scalloping.
4. **Beam Overlap:** Short 1-ft fixtures naturally overlap; 4-ft fixtures may require partial physical overlap.
5. **On-site Mock-Up:** Always test fixtures before final installation to account for wall color, texture, and reflectance.

36A

Wall Washer Installation Guidelines

Pautas de instalación para bañadores de pared
Directives d'installation pour projecteurs muraux

Beam Angles: 25°×40°×5°; 25°×50°×5°; 30°×60°×10°

These fixtures are designed for smooth, uniform wall illumination, ideal for both interior and exterior surfaces. Proper spacing, setback, and orientation are key to minimizing scalloping and achieving clean wall washing.

36B

Fixture Setback

Retranqueo de la luminaria
Recul de l'appareil

- Recommended setback from the wall is approximately 1/5 of wall height.
- The tilt of the optic gently pushes light upward for even top-to-bottom coverage.
- Adjust setback slightly depending on wall texture, height, and finish

Example

Wall Height	Typical Setback
10 ft	~2 ft
12 ft	~2.4 ft
15 ft	~3 ft

36C

Fixture Orientation

Orientación de la luminaria
Orientation du luminaire

- Fixtures should be mounted facing the wall with the tilt (5° or 10°) oriented upward.
- Proper orientation ensures even vertical coverage and prevents hotspots or uneven wash.
- Check fixture markings or installation instructions for correct tilt alignment.

36D Fixture Layout & Spacing
Distribución y espaciado de las luminarias
Disposition et espacement des luminaires

- Install fixtures in continuous runs whenever possible for the most consistent illumination.
- 1-ft fixtures: naturally produce significant beam overlap, helping eliminate scalloping.
- 4-ft fixtures: may require partial overlap or tighter center-to-center spacing depending on the optic.
- Narrower beams require closer spacing; wider beams allow for greater spacing.

1 ft Fixture Layout and Spacing

4 ft Fixture Layout and Spacing

36E Practical Fixture Spacing (Center-to-Center)
Separación práctica de luminarias (de centro a centro)
Espacement pratique des luminaires (entraxe)

Beam Angle	1-ft Fixture Spacing	4-ft Fixture Spacing	Typical Wall Height
25°×40°×5°	2.0–2.5 ft	2.5–3.0 ft	8–12 ft
25°×50°×5°	2.0–2.8 ft	2.5–3.2 ft	8–12 ft
30°×60°×10°	2.4–3.0 ft	3.0–3.8 ft	10–16 ft

Spacing assumes smooth wall washing with minimal scalloping. Adjust on-site if wall reflectance or surface finish affects uniformity.

On-Site Mock-up: Always perform an on-site test for critical applications to account for wall color, texture, and reflectance. This information is for guidance only.

Example of the Practical Spacing with a Moda Asymmetric Wash Interior 25°×40°×5° fixtures with 2.0-2.5 ft spacing
