

1

Must be installed by a qualified electrician in accordance with all national and local electrical and construction codes and regulations. Ensure system is de-energized before installation. Review electrical plans and read all installation instructions prior to installation. Failure to comply with the following installation instructions will void the warranty and may result in serious injury or possible death. With the constant development of our products please check our website (www.modalight.com) for the latest installation guide.

La instalación debe ser realizada por un electricista cualificado, de acuerdo con todos los códigos y normativas eléctricas y de construcción nacionales y locales. Asegúrese de que el sistema esté desconectado de la corriente antes de la instalación. Revise los planos eléctricos y lea todas las instrucciones de instalación antes de la instalación. El incumplimiento de las siguientes instrucciones de instalación anulará la garantía y podría provocar lesiones graves o incluso la muerte. Debido al constante desarrollo de nuestros productos, consulte nuestro sitio web (www.modalight.com) para obtener la guía de instalación más actualizada.

L'installation doit être effectuée par un électricien qualifié, conformément à tous les codes et réglementations électriques et de construction nationaux et locaux. Assurez-vous que le système est hors tension avant l'installation. Consultez les plans électriques et lisez toutes les instructions d'installation avant l'installation. Le non-respect des instructions d'installation suivantes annulera la garantie et peut entraîner des blessures graves, voire mortelles. Nos produits étant en constante évolution, veuillez consulter notre site web (www.modalight.com) pour obtenir le guide d'installation le plus récent.

Connection Orientations

Orientaciones de conexión

Orientations de connexion

6

Cable Care

Cuidado de cables

Entretien des câbles

Ensure the cable sheath remains scratch-free to prevent water ingress

Maintain the cable at the joint in its natural, unstressed state with approximately 13/16" (20mm) of length

Do Not Force Fold

Notes:

- Never pull on the cable.
- Do not apply adhesive to the connector when attaching it to a surface, as this may cause tearing, leading to water ingress and product failure.
- Except for end feed, maintain a 13/16" (20 mm) gap from a track. Close contact may damage the connector from expansion, causing water ingress and product failure.

7

Bend Specifications

Especificaciones de curvatura

Spécifications de pliage

Unlike conventional flexible fixtures restricted to a single bending axis, the MODA 3D Flex Mini Direct View is engineered for multi-axis flexibility, enabling both horizontal and vertical articulation to accommodate complex architectural geometries. Care must be taken to ensure that all bends remain within the maximum horizontal and vertical bend radius specified in this document to prevent mechanical stress or damage to the fixture.

8

3D Bendable Track

Montaje de riel flexible en 3D

Montage de rails flexibles en 3D

The 3D Bendable Track flexes both horizontally and vertically, allowing effortless adaptation to curved and complex surfaces.

The silicone housing enables reliable performance in harsh environments, including seaside installations.

Silicone - Bends both Horizontally and Vertically

Installation Note: The 3D mounting track is not suitable for ceiling applications. Cutting is not permitted; otherwise, the metal core may rust.

9

3D Bendable Track Installation

Instalación de vías

Installation de la piste

Step 1: Mark the installation area

Step 2: If necessary drill a pilot hole.

Step 3: Fasten the mounting track with appropriate fixings (by others)

Step 4: Keep the track clear of debris before installing 3D Flex Mini Direct View to avoid damage and water ingress.

10

3D Bendable Track Mounting Notes

Notas sobre el montaje de la pista flexible 3D

Notes relatives au montage des rails flexibles 3D

Ensure the mounting surface is level before installing each 3D Bendable Track. Suitable substrates include steel, aluminum, concrete, or wood.

Use hardware, bolts, or screws (supplied by others) that are properly sized for the mounting bracket bases and appropriate for the installation surface.

Ensure track is not deformed as it will not have any clamping force

Bending Maximum

Vertical Bending	Ø 11 13/16" (300mm)
Horizontal Bending	Ø 11 13/16" (300mm)

Ensure the screw is properly installed.

Do not over tighten the screw, as this may crush the silicone housing or deform the track internal structure.

No cutting is advised, otherwise the metal inside will get rusted. No extra drilling of track is permitted!

11

Expansion Gap

Brecha de expansión

Joint de dilatation

Leave around 3/16" (5mm) space between mounting track for an expansion gap.

Offset 3D Flex Mini Direct View Track joints from structural expansion seams to prevent stress on the fixture.

NO Horizontal Misalignment

NO Vertical Misalignment

12

Connector Placement in 3D Bendable Track

Colocación de conectores en una pista flexible tridimensional.

Positionnement des connecteurs dans une piste flexible en 3D

When using the 3D Bendable Track, connectors may be installed inside the track as needed, except for connectors with bottom cable entry or side cable entry.

13

Fixed and Bendable Track Fabrication

Fabricación de rieles fijos y flexibles

Fabrication de rails fixes et flexibles

Cut the mounting track to the desired length.

If the section end is 3 15/16" (100 mm) from the hole, drill a 3/16" (5 mm) hole about 13/16" (20 mm) from the end to securely fasten the track.

Ensure there is no debris inside the track
Do not use deformed track
Ensure screw heads are straight and in-line the base of the track

De-burr edges after cutting to protect the 3D Flex Mini Direct View and prevent water ingress.

14

Expansion Gap

Brecha de expansión

Joint de dilatation

Leave around 3/16" (5mm) space between mounting track for an expansions gap.

NO Horizontal Misalignment

NO Vertical Misalignment

Building Block Expansion Joint

3D Flex Mini Direct View Track

Offset 3D Flex Mini Direct View Track joints from structural expansion seams to prevent stress on the fixture.

15

Fixed and Bendable Track Installation

Instalación de rieles fijos y flexibles

Installation de rails fixes et flexibles

Step 1: Mark the installation area, then position the mounting tracks along the outline.

Step 3: If necessary drill a pilot hole.

Step 2: Mark the fixing holes.

Step 4: Fasten the mounting track with appropriate fixings (by others)

Do not use damaged or deformed mounting tracks.

Keep the track clear of debris before installing 3D Flex Mini Direct View to avoid damage and water ingress.

16

Surface-Mounted Raceway Aluminum Track

Pista de aluminio para canalización de superficie

Piste en aluminium montée en surface

Note: This track is best suited for end feed 3D Flex Mini Direct View

17

Surface-Mounted Raceway Aluminum Track Installation

Instalación de rieles de aluminio para canalización de superficie

Installation de rails en aluminium montés en surface

Step 1: Mark the installation area and then fix the outer aluminum track.

Step 3: Tighten the screws at the bottom of the outer aluminum track until fully secured.

Step 5: Insert the inner aluminum track in the rearranged sequence to maintain a staggered installation with the outer track. Verify the notch direction before installation. Tighten the screws through the retaining bracket to secure the inner aluminum track.

Step 2: If needed, insert the joining bracket into the bottom slot of outer track and centered for the length extension.

Step 4: Route the wiring under the retaining bracket and over the joining bracket.

Step 6: Press the light into place using even palm pressure and gently organize any excess cable. Seal the front connector with the end cover without a cable hole and tighten the screws. Thread the cable through the hole and seal the opposite end in the same manner.

18

Pivot Mounting Bracket

Soporte de montaje pivotante

Support de montage pivotant

19

Pivot Mounting Bracket Installation

Instalación del soporte de montaje giratorio

Installation du support de montage pivotant

Step 1: Remove the upper screw from pivot mounting bracket.

Step 2: Secure the pivot mounting bracket to the mounting track using the screw.

Step 3: Repeat Steps 1 and 2 for all remaining brackets. Ensure each mounting track has at least two locking points, preferably at equal intervals.

Step 4: Rotate the pivot mounting bracket until the unused screw hole is exposed, allowing alignment with the pre-marked hole on the mounting surface.

Step 5: Fix pivot mounting bracket to mounting surface.

Step 6: Adjust the mounting track to the required angle.

Step 7: Tighten the side screws on the pivot mounting bracket to prevent loosening of the locking point.

Warning: Ensure that the pivot mounting bracket and the mounting track remain parallel in the side view.

20

Rotary Locking Bracket

Soporte de bloqueo giratorio

Support de verrouillage rotatif

21

Rotary Locking Bracket Installation

Instalación del soporte de bloqueo giratorio

Installation du support de verrouillage rotatif

Step 1: Mark the installation position on the mounting surface.

Step 2: Fix the mounting track to the rotary locking bracket by screws.

Step 3: Set the mounting track aside and secure the rotary locking bracket to the mounting surface with screws along the marking line.

Step 4: Return the mounting track to its original position. If you are extending the length—one light fitting across multiple mounting tracks—skip ahead to step 7.

Step 5: Install the light in order, leaving the front connector and end cap outside the mounting track.

Step 6: Power on the light and rotate the mounting track to the desired lighting angle.

Step 7: Maintain a 5mm spacing between mounting tracks to accommodate expansion and contraction.

Step 8: Fit the light into the first piece of mounting track and keep the remaining lights coiled. Next repeat step 6 to adjust the lighting angle.

Step 9: Adjust the rest of the mounting tracks to match the same angle, and then install the coiled light in order.

Step 10: If you need further adjustment after installation, please fine tune rotary locking bracket 15 degree each time one by one in case of twisting on lights.

22

Ceiling Mounting Bracket

Soporte de montaje en techo
Support de fixation au plafond

23

Ceiling Mounting Bracket Installation

Instalación del soporte de montaje en el techo
Installation du support de fixation au plafond

Step 1: Gently unfold the spring and slide it into the mounting tracks groove.

Step 3: Repeat Steps 1 and 2 for the remaining brackets, ensuring each mounting track is secured at a minimum of two locking points. Equal spacing between locking points is recommended.

Step 5: Use your hands to hold the springs, then release them once the unit is clipped into the ceiling.

Step 2: Move the ceiling mounting bracket forward by $3\frac{1}{8}$ " (80mm), then tighten the screw firmly.

Step 4: Mark the ceiling and cut the slot as instructed.

Notes: The width applicable to : $\frac{7}{8}$ " to 1" (22~25mm)
The thickness of ceiling: $\frac{3}{16}$ " to 2" (5~50mm)
Only applicable to flanged serrated aluminum track.

24

Suspended Raceway Aluminum Track

Pista de carreras suspendida de aluminio

Piste de course suspendue en aluminium

25

Suspended Raceway Aluminum Track Installation

Instalación de rieles de aluminio para canalización suspendida

Installation de la piste en aluminium suspendue

Step 1: Mark the mounting position and input end on the ceiling with sufficient load-carrying capacity.

Step 2: Mount the outer portion of the cable couplers to the ceiling and secure them with screws.

Step 3: Thread steel wire through the inner part of cable coupler and its molded stop will prevent the wire from falling out.

Step 4: Unscrew the coupling nut on the top of cable gripper and then push in the plunger to allow the other end of steel wire to thread through the keyhole of cable gripper.

Step 5: Tighten the assembled cable grippers to the mounted outer part of cable couplers.

Step 6: If needed, insert the joining bracket into the bottom slot of outer tracks and centered for the length extension.

Step 7: Using the same procedure as steps 3 through 6, Surface Mounted Track installation. See page 6 section 18.

Step 8: Flip the outer aluminum tracks. Then unscrew the hex bolt of cable gripper and slide it in from the open slots where rubber grommets lay.

Step 9: Tighten the bushings of cable grippers with the hex bolts.

Step 10: Adjust the position of cable grippers and the length of steel wires to the desired ones, and remain all of the steel wires hanging vertically. Tighten the coupling nut and cut or roll up the excess steel wire at last.

26

Suspended Mounting Rod

Varilla de montaje suspendida
Tige de montage suspendue

27

Suspended Mounting Rod without Wiring Installation

Varilla de montaje suspendida sin instalación de cableado.
Tige de montage suspendue sans installation de câblage

Step 1: Mark the installation position of clevis on the ceiling with sufficient load-carrying capacity.

Step 3: Assemble the mounting flange and the rods in order of 1, 2 and 3.

Step 5: Shield the clevis by the mounting flange and rotate anticlockwise until it clicks into place.

Step 2: Secure the clevis by tightening the screws.

Step 4: Rotate and fasten them clockwise.

Step 6: Adjust the clip to the angle you need (max. 180° in a clockwise direction).

28

Suspended Mounting Rod with Surface Wiring

Varilla de montaje suspendida con cableado de superficie.

Tige de montage suspendue avec câblage apparent

Step 1: Mark the installation position of clevis on the ceiling with sufficient load-carrying capacity.

Step 4: Rotate and fasten them clockwise.

Step 7: 1 Adjust the clip to the angle you need (max. 180° in a clockwise direction)... 2 Install the light to the clip and adjust the cable length.

Step 2: Cut a cable hole following the pre-marked notch on the lateral side of the mounting flange.

Step 5: Thread the cable through slotted hole to the top of rod.

Step 8: Shield the clevis by the mounting flange and rotate anticlockwise until it clicks into place.

Step 3: Assemble the mounting flange and the rods in order of 1, 2, 3, 4.

Step 6: Tighten the clevis by screws.

Step 9: Connect the DC 24V Power

29

Suspended Mounting Rod with Concealed Wiring

Varilla de montaje suspendida con cableado de superficie.

Tige de montage suspendue avec câblage apparent

Step 1: Mark the installation position of clevis on the ceiling with sufficient load-carrying capacity, and in between punch a $\varnothing 20\text{mm}$ cable hole.

Step 4: Rotate and fasten them clockwise.

Step 7: 1 Thread the cable through holes to the inside of ceiling... 2 Install the light to the clip and adjust the cable length.

Step 2: Tighten the clevis by screws.

Step 5: Shield the clevis by the mounting flange and rotate anticlockwise until it clicks into place.

Step 8: Connect the DC 24V Power

Step 3: Assemble the mounting flange and the rods in order of 1, 2, 3, 4.

Step 6: Adjust the clip to the angle you need (max. 180° in a clockwise direction).

30

Suspended Mounting Wire

Cable de montaje suspendido

Fil de suspension

Applicable to serrated aluminum track.

31

Suspended Mounting Wire Installation

Instalación de cable de montaje suspendido

Installation de câbles de suspension pour montage en hauteur

Step 1: Mount the attachment of cable couplers to the ceiling with sufficient load-carrying capacity and tighten them with screws.

Step 3: Insert the screw into the serrated aluminum track to lock with the cable gripper sliding from the bottom slot of serrated aluminum track.

Step 5: Fix the light into the aluminum track.

Step 2: Thread the stainless steel wire through the male screw of cable couplers and then connect to the mounted attachment of cable couplers.

Step 4: Thread the stainless steel wire through the bushing of cable gripper.

Step 6: Adjust the length of stainless steel wires to the desired height. Tighten the coupling nut and cut or roll up the excess stainless steel wires after the power-on test.

32

Side Mounting Bracket

Soporte de montaje lateral

Support de montage latéral

33

Side Mounting Bracket Installation

Instalación del soporte de montaje lateral

Installation du support de montage latéral

Step 1: Remove the M3x6 screw of side mounting bracket.

Step 3: Repeat Steps 1 and 2 for all remaining brackets. Ensure each mounting track has a minimum of two locking points, and use equal spacing whenever possible.

Step 5: Fix the side mounting bracket by using suitable fixings (by others).

Step 2: Fix side mounting bracket and mounting track tightly by the screw.

Step 4: Mark the pilot holes on mounting surface accordingly.

34

Bendable Mud-in Aluminum Track

Riel de aluminio flexible para empotrar en masilla

Rail en aluminium cintrable à encastrer

35

Bendable Mud-in Aluminum Track Installation

Instalación de riel de aluminio flexible para empotrar

Installation d'un rail en aluminium flexible à encastrer

Step 1: Mark the installation area and power input on the surface.

Step 2: Drill the slot along the marked outline. (Slot Width: 7/8" (21.5mm+0.5mm))

Step 3: Place the profile inside the slot and tighten the wings with screws. Make sure the screws are fastened to the wings in a staggered pattern.

Step 4: Install the PVC cover. The cover is made up of recyclable materials, so the color may vary from batch to batch.

Step 5: Apply plaster over the wings and spread it until it's flush with the profile.

Step 6: Once dry, paint over the plastered wings.

Step 7: Remove the PVC cover and clean the slot.

Step 8: Test the light, then thread the cable through the cable exit slot.

Step 9: Keep the insertion angle below 15°. Use your palm, not fingers to press the light into the profile, and install it vertically.

Step 10: Installation is complete.

36

3D Flex Mini Direct View Unboxing

Desempaquetado del 3D Flex Mini Direct View

Déballage du 3D Flex Mini Direct View

Step 1: Inspect Packaging Before Opening.

- Check for visible shipping damage.
- If damaged, photograph the package before opening and report immediately.

Step 3: Installation

- Hold the strip with two hands when moving.
- Do not install the 3D Flex Mini Direct View into the mounting channel without assistance, and never bend the strip beyond its specified limits.
- **We Recommend using two people to install the fixture.**

Step 2: Open Packaging and Remove Fixture Carefully

- Use a safety knife or scissors to cut tape, avoiding deep cuts that could damage the product inside.
- Do not use sharp tools near the 3D Flex Mini Direct View LED surface.

Step 4: Feeder Cable Care

- The 3D Flex Mini Direct View feed cable must be handled with care to maintain integrity. Excessive bending, pulling, or stress at the cable entry point can compromise internal connections and degrade the IP-rated seal, resulting in potential failure of the luminaire.

Avoid pulling or sharply bending the feed cable to protect internal connections and the ingress protection.

37

3D Flex Mini Direct View Installation

Instalación de la pantalla 3D Flex Mini de visión directa

Installation de l'écran 3D Flex Mini à visualisation directe

Step 1: Start installing with one end of the light. Make sure the light fits into track or bracket vertically.

Step 3: Keep the angle between the 3D Flex Mini Direct View and mounting track under 30° to prevent damage to the fixture.

Step 2: Press the light all the way into the track or bracket by the palm of your hand instead of your fingers.

Step 3: Install the light from other end of the track when there is more than 2 meters left. This helps align the light with the track

38

Removing 3D Flex Mini Direct View from Mounting Track

Cómo retirar el 3D Flex Mini Direct View del riel de montaje

Retrait du 3D Flex Mini Direct View du rail de montage

To remove the 3D Flex Mini Direct View from the mounting track or bracket, gently insert a flat-head screwdriver between the bottom of the 3D Flex Mini Direct View and the mounting surface, and carefully pry the fixture upward. Once the 3D Flex Mini Direct View begins to lift out of the bracket, stop using the screwdriver and use your hands to pull the fixture out, maintaining approximately a 30° angle during removal.

Handle the fixture carefully to avoid damaging the silicone jacket, which protects against water ingress. Do not repeatedly install the fixture.

When installing two fixtures in parallel, maintain a 4" gap for proper heat dissipation.
